

To the Members of the California State Senate:

I am returning Assembly Bill 267 without my signature.

The education finance district model proposed by this bill could allow for manipulation of parcel tax boundaries for the purpose of achieving the desired election outcome. I am concerned that voters and property owners in one county or school district could be subject to an increased special tax based on votes generated predominately in another county or school district.

For these reasons, I am unable to sign this bill.

Sincerely,

Arnold Schwarzenegger
